

Translate Speech

Change the line 151 in google_trans_new/google_trans_new.py which is: response = (decoded_line + ']') to response = decoded_line 위치는 : /home/pi/.local/lib/python3.9/site-packages/google_trans_new

```
from google_speech import Speech
from google_trans_new import google_translator

translator = google_translator()
translate_text = translator.translate("안녕하세요 ", lang_tgt='en')

speech = Speech(translate_text, 'en')
speech.play()

print(translate_text)
```

•

```
from googletrans import Translator
from google_speech import Speech
from time import sleep

stringWord="다운타운D.C.は、ホワイトハウスの近くに抗議し、挑発の別の夜の後に燃えます"

translator = Translator()
#result = translator.translate('안녕하세요.', dest='ja')
result = translator.translate(stringWord, dest='ko')
print(' -> ', result.text)
speech = Speech(result.text, 'ko')
speech.play()
sleep(2)
result = translator.translate(stringWord, dest='en')
print(' -> ', result.text)
speech = Speech(result.text, 'en')
speech.play()
sleep(2)
result = translator.translate(stringWord, dest='ja')
print(' -> ', result.text)
speech = Speech(result.text, 'ja')
speech.play()
```
